

State Health Requirements

Does your child need medication during the school day? Please complete the [Authorization to Administer medication at school Form \(PDF\)](#).

The Iowa Department of Public Health state law requires every school to have an up to date and completed certificate of immunization on file for each student enrolled.

Please use this health form matrix to determine which medical forms and immunizations are required for students at each grade level. All completed forms are to be turned in or faxed to your child's appropriate building.
